

VR3 Vertical Blinds

trend

Vertical blinds are produced of fabric. Their slats are produced in two different vertical slats in widths of 89mm and 127mm.

Top fabric choice is sunscreen while blackout is also preferred for room darkening purposes. Sunscreen is transparent blackout is opaque.

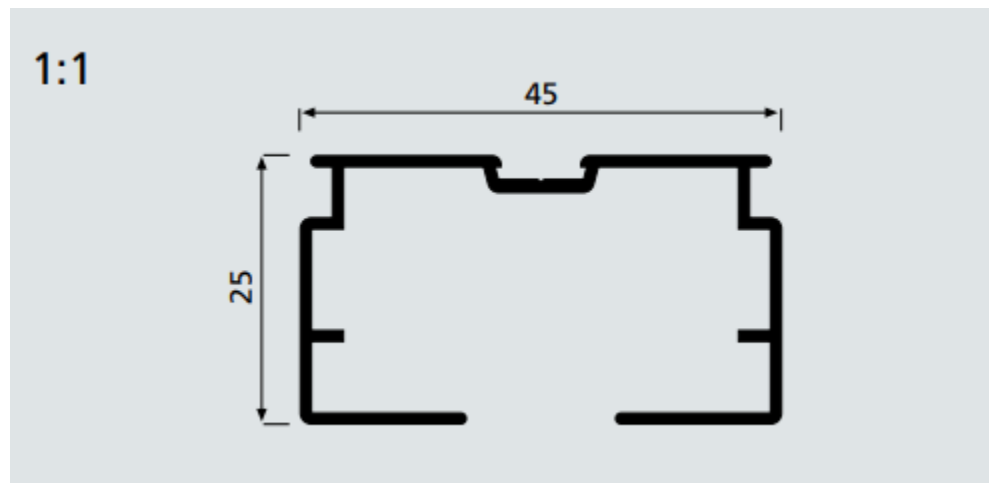

Thanks to 180 degree right and left movability, vertical blinds allow to control sunlight getting in the space as well as heat. Vertical blinds are produced in custom sizes.

Control options:

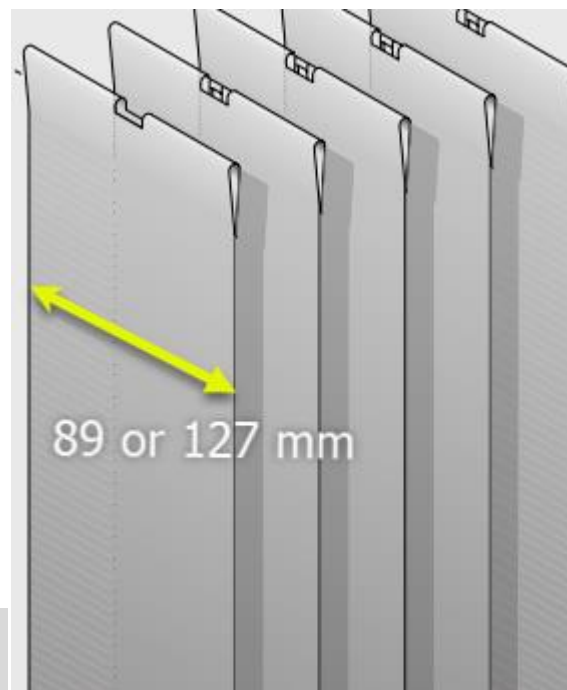

- Manual chain op
- Motorized.

Such type of blinds are easy to clean by wiping a dust cloth or removing dusts between strips with a vacuum sweeper. PVC and wooden versions are mainly preferred for offices, hotels, schools, hospitals and public buildings. Fabric version is mainly preferred for homes.
